NUMIDIA
YOUR EXPERT PARTNER IN DAIRY

For the Finance Reporting and Analysis Department at our HQ in Herten (Roermond) in the Netherlands, we are looking for a

(sr.) Data Engineer (M/F)
Fulltime

If you are interested in a challenging, international and dynamic function in a fast-growing organization, we are looking for you!

The position
As a data engineer within the Finance Reporting and Analysis Team, you are a critical link between market data, automation, and strategic business outcomes. This would be ideal for the second step in your career, empowering you to own and improve the technical infrastructure.

Your core task is to streamline data stability and flow by optimizing our existing Python scripts. Furthermore, you will be instrumental in driving organizational efficiency by leveraging the Power Platform (especially Power Automate) to introduce automation and process optimization across various business functions, ensuring data accuracy for downstream financial analysis. The insights derived from these improved data streams will be translated into clear, actionable Power BI visualizations, directly supporting executive decision-making. We seek a technically adept engineer with good communication skills who can influence processes and present complex data clearly to all levels of the organization.

Tasks and responsibilities
- Python Architect: Optimize and secure all Python scripts for rock-solid ETL and financial reporting stability;
- Data Reliability: Implement advanced error handling to eliminate data pipeline issues;
- Automation Driver: Lead company-wide process automation using Power Automate workflows, RPA and AI;
- Insight Visualization: Build visually compelling, high-impact Power BI dashboards for executive steering;
- Strategic Analysis: Deliver and analyze data to support decision-making;
- Data Governance: Establish and enforce standards for data quality and integrity;
- Communicate Impact: Translate technical findings into clear, persuasive reports for stakeholders;

We offer
- ✨ Challenging job within a young, international company with a strong growth ambition
- 🎉 Proud to be certified as a Great Place to Work – join a culture where people come first!
- 🏢 A fantastic new office – inspiring & modern
- 📅 28 vacation days, increasing to 30 in the coming 3 years
- 🚗 Travel allowance
- 💰 Full pension contribution – paid by Numidia
- 🥗 Unique perk: Fresh lunch 3x per week – together with your colleagues
- 📈 Continuous development opportunities – grow your expertise and career

We are looking for a Market Intelligence Analyst/Programmer who
- Has MSC degree;
- Has a minimum of 3 years relevant experience;
- Excellent Analytical and communicative skills;
- Possesses the following competences: Teamwork, Effective Communication, Management and Responsibility, Leadership, Focused and Initiative, Customer focus, Relationship building, Analytical, Financial Awareness;
- Strong knowledge of related software and tools. Advanced knowledge of Python is required, along with affinity for MS Excel, and the Power Platform (especially Power BI, Power Automate. *Training on specific in-house tools is possible;*
- Is fluent in English, Dutch is a pre.

About Numidia

Numidia is a dynamic company, specialized in the international trade of quality dairy products (butter, cheese, milk powders, liquids, etc.), dairy related ingredients and dairy derivatives.
